Jobs description

● Epoxy Terrazzo

It is one of cladding styles that was used in the past and known to the world from the century by Italian artists. With time, terrazzo was revived after an evolution, as it was implemented in the past by mixing a group of broken stones that are mixed with clay to make small tiles, where the idea of the product is developed currently by using a large group of broken different materials such as stone, marble, glass and many other materials

● Advantages of epoxy terrazzo

- ✓ It can be poured over a large area without breaks
- ✓ It can be implemented with infinite technical options
- ✓ It can be implemented with mm 8 a thickness up to
- ✓ Slip resistant
- ✓ High resistance to acids and alkalis

● Stone Carpet Flooring

They are modern, sustainable, environmentally friendly flooring that can be implemented from a variety of broken stones, natural marble and granite by linking its parts through a binder and then using specialized materials to provide additional protection for the surface

Features of Stone Carpet Flooring

- ✓ They are waterproof floors
- ✓ Can be poured over a large area without breaks
- ✓ It can be implemented with different technical options
- ✓ cm 1 It can be implemented with a thickness up to
- ✓ Slip resistant

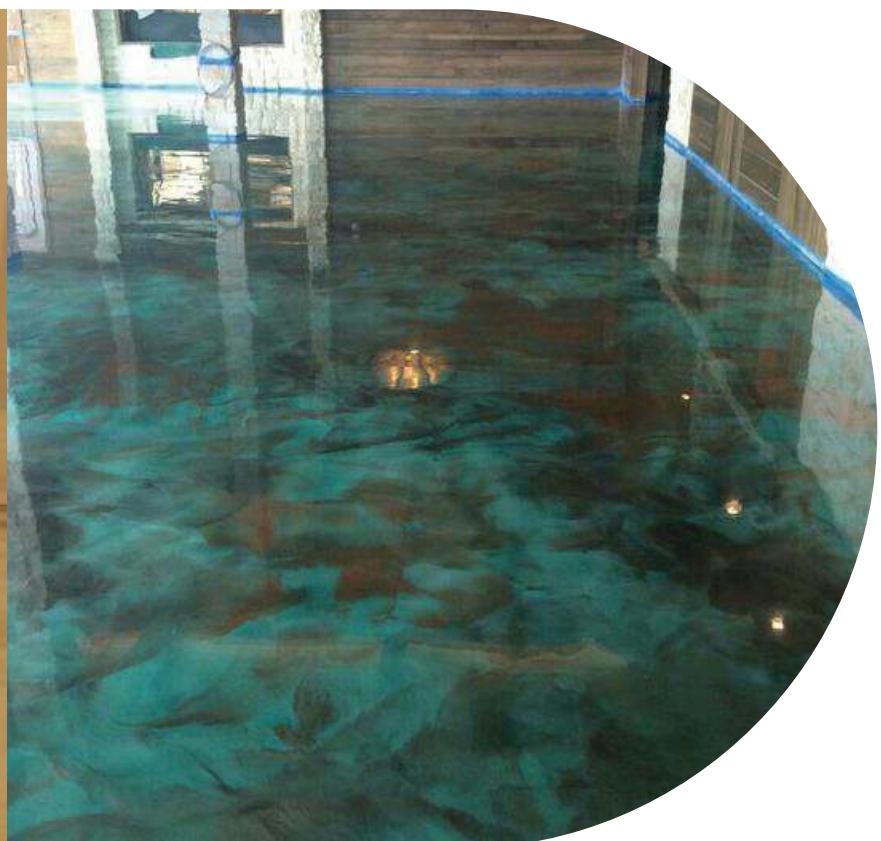

● Colored resin floors

They are floors in which they are executed by coloring resin with specialized colors and then mixed according to the desired artistic output. Resin floors are the latest and fastest in architectural design projects

● 3D resin floors

It is a floor in which a unique design or high-resolution image is created and printed using the finest German stickers and the latest printing machines, after which two layers of high-transparency epoxy resin are poured to give a three-dimensional effect

● Features of resin floors

- ✓ Execution speed
- ✓ It can be implemented with infinite technical output
- ✓ It can be applied on most existing floors
- ✓ One piece without breaks
- ✓ Low thickness ranging mm 3 to 1.5 from
- ✓ You do not need to adjust the level of existing doors
- ✓ Resistant to bacteria and fungi
- ✓ Ease of maintenance

● Risen Tables

Risen is used in many areas of decoration and furnishings, as it is pourable on different thicknesses and high durability as they can be used in the dining table industry. Where graffiti materials are safe on food" and small table" and office making as well as counter top surfaces. It can also be implemented in kitchens in the work of kitchen service surfaces

● Microcement

It is a modern way in which surfaces are given a special effect in particular cement concrete free of defects which is produced naturally with concrete casting giving the place a modern decor character

● Plastic paints

They are water-based paints that are applied on various interior surfaces, whether they are cement or gypsum surfaces, which includes treating plaster cracks, treating and working to level the surface of the walls

Special external spray

It is a type of modern spraying that is applied on facades and external walls, which gives a special effect like rough surface stone

● Special external spray

It is a type of modern spraying that is applied on facades and external walls, which gives a special effect like rough surface stone

● Marble break

It is one of the methods of cladding the facades and external walls by using broken stones, natural marble and glass by fixing it on a strong adhesive cement material

● **Decorative paints**

They are decorative products that are implemented on the internal and external walls to give a special effect that carries an artistic value that represents an aesthetic element in the surroundings of the place and leaves an impression of luxury and sophistication

● **Decorative paints**

It is a kind of old classical art, in which we gild the surfaces with luxurious Belgian gold leaf, which gives a sense of luxury, which is recommended for use in councils, offices and rooms in which you would like to establish a sense of luxury and sophistication for all your visitors

● Epoxy floors

It is one of the latest trends in the implementation of epoxy floors, which have recently arrived in the Saudi market, and we are considered one of the pioneers in its implementation, as the epoxy floors are implemented with the addition of a group of flakes on the floor, which exceeds the aesthetic effect of the place. It can be used in offices, factories and parking lots because of the great strength and functionality of the product in use

● Self-level epoxy floors

It is the implementation of epoxy paints with special materials that are free from self-leveling solvents. They are applied on a thickness mm, which gives 3-1 of them the ability to treat uneven surfaces on which they are applied

● Traditional epoxy floors

It is the implementation of high-quality epoxy paints after treating the concrete surface in the appropriate manner, and then carrying out floor planning works according to the required plan

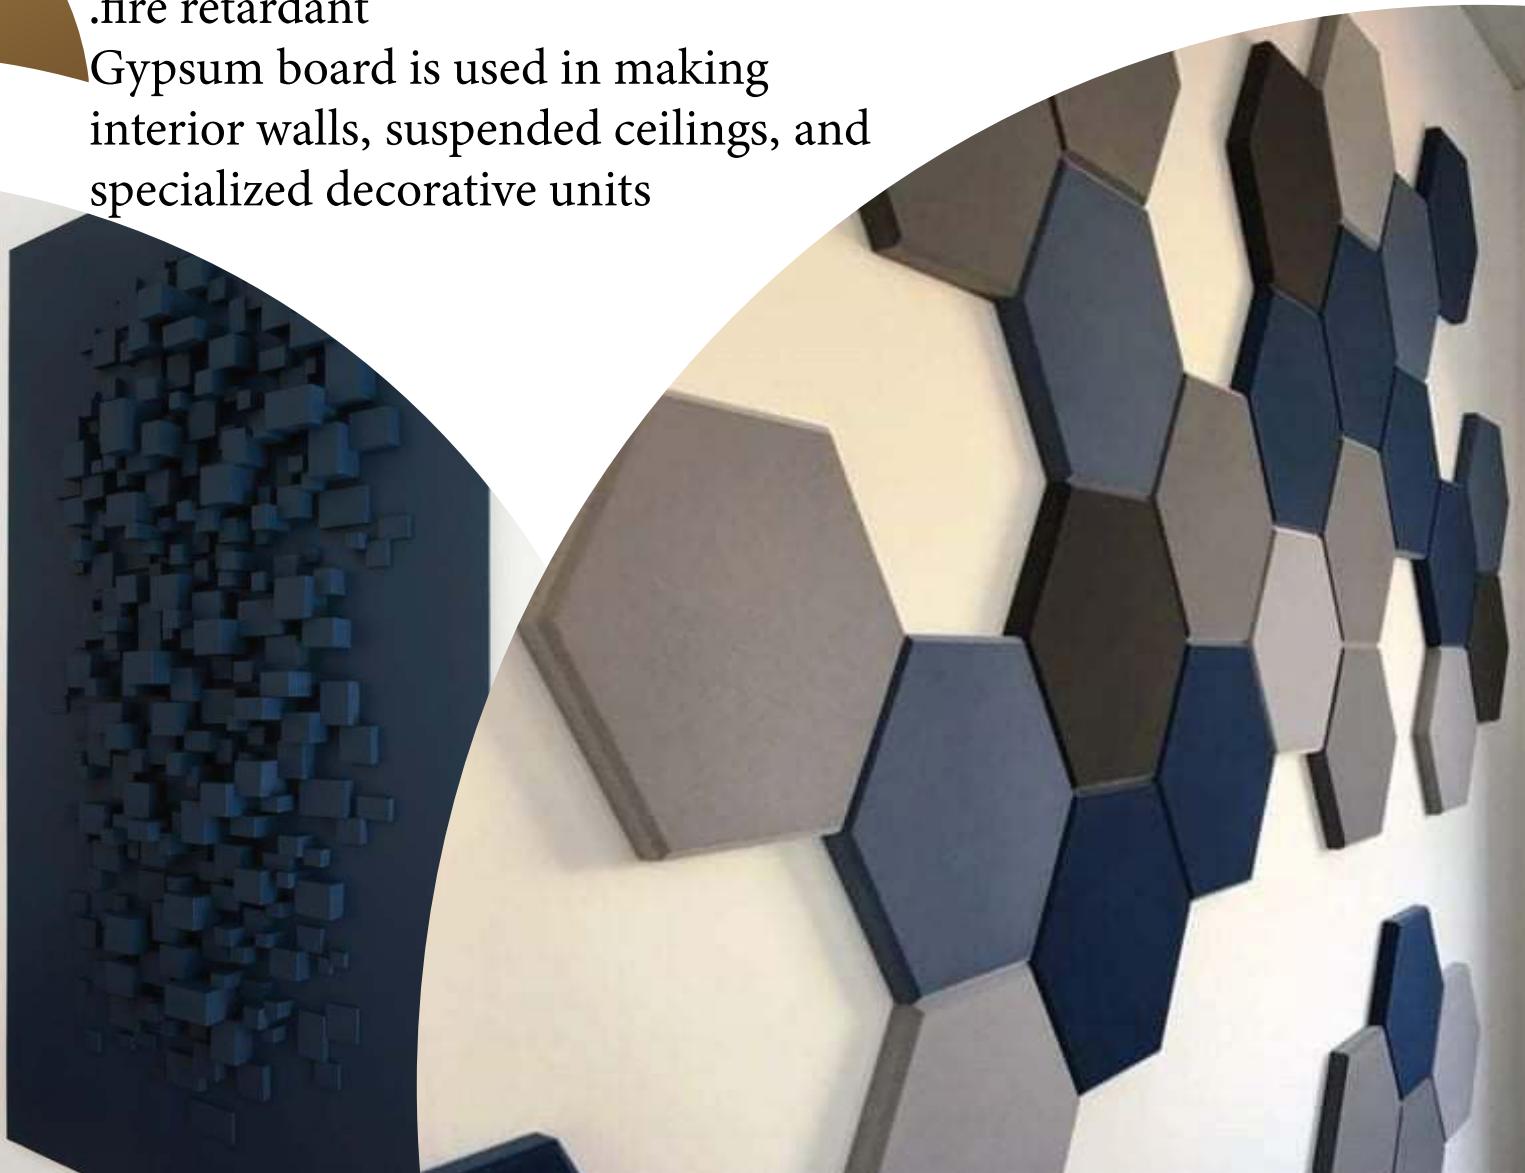

● Gypsum board

Gypsum board is panels made of treated gypsum, and it consists of non-flammable materials added to gypsum to give it strength, after which the panels are covered with one or two layers of chemically treated cardboard, and all these materials are collected in a specific way to form panels used in making decorations from gypsum whether for the home, restaurants, cafes and hotels, there are specialized types such as moisture resistance and fire retardant

Gypsum board is used in making interior walls, suspended ceilings, and specialized decorative units

● 3D walls

It is one of the latest elements of wall decorations, in which modern decorative units are used to be installed on the walls to give a unique aesthetic effect without using different colors, which gives a feeling of decoration without visual crowding

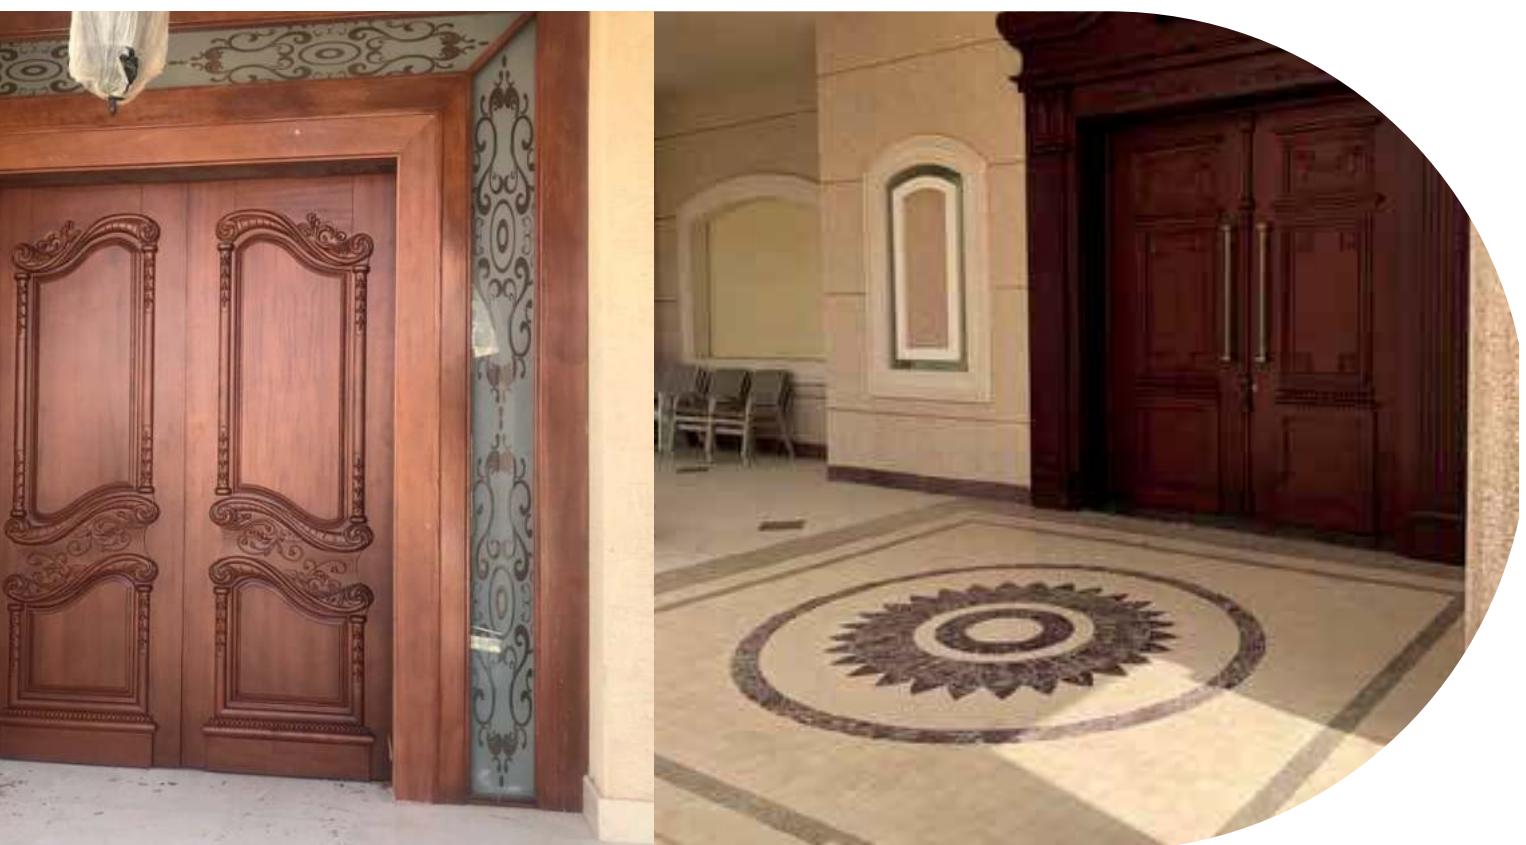

● Plant walls

The walls are arranged with a variety of artificial plants to give a unique form of mixing nature with architecture

● Carpentry works

We have a specialized team of skilled technicians who are able to carry out all wood works using the best natural and industrial wood materials and using the best types of tools and equipment necessary to carry out the work with high quality

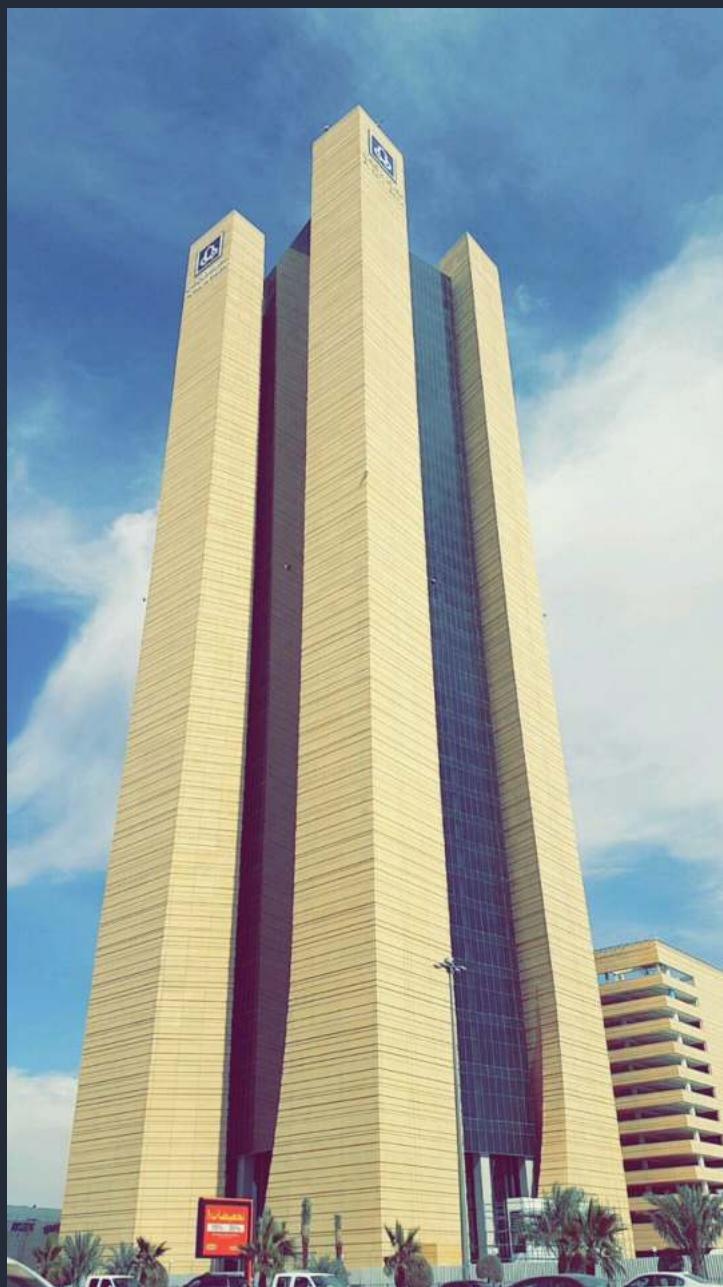

● Marble and ceramic works

Marble and ceramic works are among the basic items that are frequently used in all projects. Therefore, we were keen to develop the skills of our team to be able to provide a quality worthy of our customers. We install all kinds of ceramics, marble and porcelain for various surfaces, in addition to marble washbasins
